The Dictionary of Filtration and Separation

Steve Tarleton and Richard Wakeman

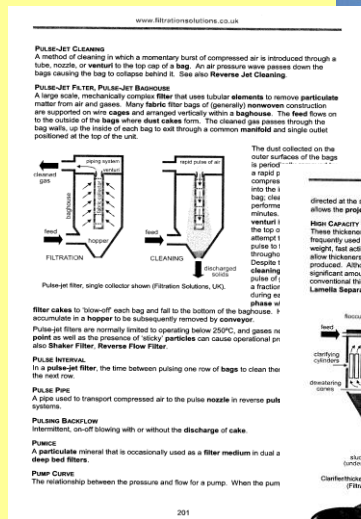

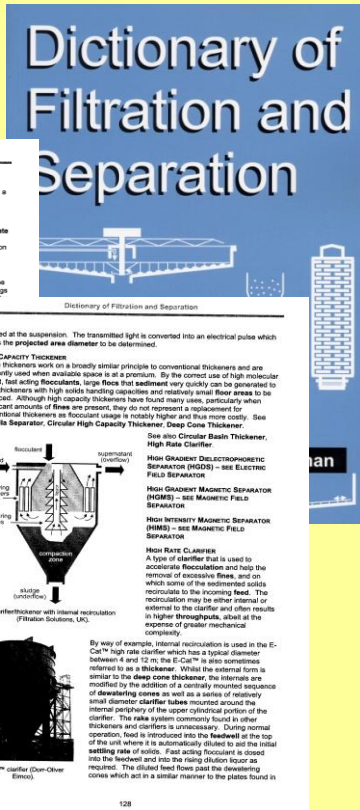

Over 1500 definitions of terms for solid/liquid separation, air/gas/dust separations, filter media, contamination control etc – from Abatement and Abrasion to Zone Settling and Zwitterion – plus a list of abbreviations and acronyms – are provided in this quick reference dictionary (vi + 303 pages). Clear, bold type entries give a direct lead into the detail and use of equipment, and define precisely the meanings of terminology.

The book is an authoritative and up to date text which is cross-referenced and illustrated by over 400 diagrams and photographs. It is a source of reference for all practitioners of filtration and separation, and a valuable educational and training resource. It is indispensable for plant engineers, technicians, operators, and all who work with filtration and separation technology as buyers, users, and suppliers of equipment. It is also useful to managers in production and service industries, graduate students and researchers, and standards and health and safety inspectors.

Some comments from users:

- "I want to congratulate you for this impressive editorial work and I am sure your book will be a very useful help to me, especially with the precise technical terms in English. So we can use the book as a real dictionary." Prof. S, Germany.
- "We would like to purchase further copies of the Dictionary to use as a prize for a competition" NB, UK
- "It's not often that you can describe any book whose title starts with 'Dictionary' as being a little gem, but 'The Dictionary of Filtration and Separation' rightfully deserves the accolade." Dr R, UK.
- "The Dictionary of Filtration and Separation' is so full of useful information that I wish to purchase more copies for my clients." IA, Kuwait.
- "I am exploring new avenues for adding technical content to the AFS monthly newsletter. I was wondering if you would give us permission to borrow content from your new book 'Dictionary of Filtration and Separation.'" SS, USA.
- "Since the book is so useful, I wish to use selected terms from your Dictionary of Filtration and Separation on my company's website." HO, USA.

The authors are international experts in filtration technologies who have been Chairmen of The Filtration Society. Their work has been recognised by awards from several professional institutions. Richard Wakeman is the Honorary Secretary of The Filtration Society, a Fellow of the Royal Academy of Engineering and an international consultant specialising in particle/fluid separation processes. Steve Tarleton is a mechanical engineer and a Senior Lecturer at Loughborough University.
